

Zoonotic Disease Report July 17 – July 23, 2016 (Week 29)

Executive Summary

- Boulder County had three West Nile virus positive mosquito pools – two from Zone 2 (Longmont) and one from Zone 3 (Louisville, Lafayette, Erie and Superior). The Zone 3 positive was a mixed pool from Louisville and Lafayette traps.
- Statewide, eighteen positive mosquito pools have been identified from: Weld (8), Boulder (4), Larimer (4), Arapahoe (1) and Mesa (1) Counties.
- Three bats and one raccoon were tested for rabies. One bat specimen tested positive.
- No specimens were submitted for plague, tularemia or hantavirus.

Information about symptoms, transmission, and prevention is always available at BoulderCountyVector.org

West Nile Virus (WNV) Activity

SEASON-TO-DATE HUMAN WEST NILE VIRUS (WNV) ACTIVITY			
Location	Non-Neuroinvasive Disease Cases	Neuroinvasive Disease Cases	Deaths
Boulder County	0	0	0
Colorado	3	0	0
United States	***	***	***

NOTE: Numbers in **red** signify an increase from the previous week.

*** Indicates incomplete data

Mosquito Activity

West Nile Virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile Virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District's adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

NOTE: (*) indicates that every pools submitted for that zone tested positive, therefore an infection rate and vector index for that zone cannot be calculated.**

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect samples submitted by Boulder County Public Health and may not include samples submitted by other agencies or private veterinary practices
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
