Table 34.	Percentage of students who had been electronically bullied during the past 12 months	17
Table 35.	Percentage of students who had been teased or name called because of race or ethnic background in the past 12 months	18
Table 36.	Percentage of students who had been teased or name called because of perceived sexual orientation in the past 12 months	18

Violence

Table 37.	Percentage of students who purposefully hurt themselves without wanting to die in the past 12 months	19
Table 38.	Percentage of students who carried a weapon such as a gun, knife, or club on 1 or more of the past 30 days.....	19
Table 39.	Percentage of students who carried a weapon such as a gun, knife, or club on school property on 1 or more of the past 30 days.....	20
Table 40.	Percentage of students who did not go to school on 1 or more of the past 30 days because they felt they would be unsafe at school or on their way to or from school	20
Table 41.	Percentage of students who had been threatened or injured with a weapon such as a gun, knife, or club on school property 1 or more times during the past 12 months	21
Table 42.	Percentage of students who were in a physical fight 1 or more times during the past 12 months	21
Table 43.	Among students who dated or went out with someone during the past 12 months, the percentage who had been physically hurt on purpose by someone they were dating or going out with 1 or more times during the past 12 months.....	22
Table 44.	Percentage of students who had ever been physically forced to have sexual intercourse when they did not want to	22
Table 45.	Percentage of students who had been threatened or injured as a result of gang activity in the past 12 months.....	23

Mental Health

Table 46.	Percentage of students who reported their mental health as not good 1 or more days during the past 30 days	23
Table 47.	Percentage of students who felt so sad or hopeless almost every day for 2 weeks or more in a row that they stopped doing some usual activities during the past 12 months	24
Table 48.	Percentage of students who seriously considered attempting suicide during the past 12 months.....	24

Table 49.	Percentage of students who made a plan about how they would attempt suicide during the past 12 months	25
Table 50.	Percentage of students who actually attempted suicide 1 or more times during the past 12 months	25
Table 51.	Percentage of students whose suicide attempt in past 12 months resulted in an injury, poisoning, or overdose that had to be treated by a doctor or nurse	26
Table 52.	Percentage of students who have an adult to go to for help with a serious problem	26
Table 53.	Percentage of students who would most likely talk to a parent, teacher, or other adult when feeling sad, empty, hopeless, angry, or anxious	27

Safety

Table 54.	Among students who rode a bicycle during the past 12 months, the percentage who never or rarely wore a bicycle helmet	27
Table 55.	Percentage of students who never or rarely wore a seat belt when riding in a car driven by someone else	28
Table 56.	Percentage of students who rode 1 or more times during the past 30 days in a car or other vehicle driven by someone who had been drinking alcohol	28
Table 57.	Among students who drove a car or other vehicle during the past 30 days, the percentage who drove 1 or more times during the past 30 days when they had been drinking alcohol	29
Table 58.	Among students who drove a car or other vehicle during the past 30 days, the percentage who texted or e-mailed while driving on 1 or more of the past 30 days	29
Table 59.	Percentage of students who rode 1 or more times during the past 30 days in a car or other vehicle driven by someone who had been using marijuana	30
Table 60.	Among students who drove a car or other vehicle during the past 30 days, the percentage who drove 1 or more times during the past 30 days when they had been using marijuana	30

Tobacco

Table 61.	Percentage of students who have ever smoked a whole cigarette.....	31
Table 62.	Percentage of students who smoked a whole cigarette for the first time before the age of 13	31
Table 63.	Percentage of students who smoked cigarettes on 1 or more of the past 30 days	32
Table 64.	Percentage of students who smoked cigarettes on 20 or more of the past 30 days	32
Table 65.	Percent of students who feel it would be sort of easy or very easy to get cigarettes if they wanted	33
Table 66.	Among students who were less than 18 years of age and who reported current cigarette use, the percentage who usually got their own cigarettes by buying them in a store or gas station during the past 30 days	33
Table 67.	Among underage students who attempted to buy cigarettes, the percent who were refused because of age	34
Table 68.	Among students who reported current cigarette use, the percentage who ever tried to quit smoking cigarettes during the past 12 months	34
Table 69.	Among students who currently smoke, percent of students who want to quit smoking either soon or eventually but not right now	35
Table 70.	Percentage of students who would definitely or probably smoke a cigarette offered by 1 of their best friends.....	35
Table 71.	Percentage of students who think they would definitely or probably smoke a cigarette in the next year	36
Table 72.	Percentage of students who smoked a cigar, cigarillo, or little cigar during the past 30 days	36
Table 73.	Percentage of students who used chewing tobacco, snuff, or dip on 1 or more of the past 30 days.....	37

Table 74.	Percentage of students who have ever used an electronic vapor product.....	37
Table 75.	Percentage of students who used an electronic vapor product in the past 30 days	38
Table 76.	Percentage of students who ever smoked a hookah or sheesha	38
Table 77.	Percentage of students who ever used snus or other spitless tobacco	39
Table 78.	Percentage of students who smoked cigarettes, smoked cigars, used chewing tobacco, or smoked an e-vapor products on 1 or more of past 30 days.....	39
Table 79.	Percentage of students who think people who smoke 1 or more packs of cigarettes per day have a moderate/great risk of harming themselves	40
Table 80.	Percentage of students who think their parents or guardians would feel it is wrong/very wrong if they smoked cigarettes	40
Table 81.	Percentage of students who were inside their home while someone was smoking a cigarette, cigar, or pipe during the past 7 days	41
Table 82.	Percentage of students who were inside a car while their parent was smoking a cigarette, cigar, or pipe during the past 7 days.....	41
Table 83.	Percentage of students who think breathing second hand smoke has a moderate or great risk.....	42

Alcohol

Table 84.	Percentage of students who had at least 1 drink of alcohol on 1 or more days during their life.....	42
Table 85.	Percentage of students who had their first drink of alcohol other than a few sips before the age of 13	43
Table 86.	Percentage of students who had at least 1 drink of alcohol on 1 or more of the past 30 days.....	43
Table 87.	Percentage of students who had 5 or more drinks of alcohol in a row, that is, within a couple of hours, on 1 or more of the past 30 days.....	44
Table 88.	Percentage of students who drank on school property during the past 30 days.....	44
Table 89.	Percentage of students who think a typical student drank alcohol 1 or more days in the past 30 days	45
Table 90.	Percentage of students who think a typical student binge drank, or had 5 or more drinks in a row, on 1 or more days in the past 30 days.....	45
Table 91.	Percentage of students who feel it would be sort of easy or very easy to get alcohol if they wanted	46
Table 92.	Among students who reported current alcohol use, the percentage who usually got the alcohol they drank from someone who gave it to them during the past 30 days.....	46
Table 93.	Percentage of students who usually drank in public setting, on school property, or riding in a car, of all students who drank in past 12 months.....	47
Table 94.	Percentage of students who think people who have 1 or 2 drinks nearly every day have moderate/great risk of harming themselves.....	47
Table 95.	Percentage of students who think it is wrong/very wrong for someone the same age to drink alcohol regularly (at least once or twice per month)	48
Table 96.	Percentage of students who think their parents or guardians would feel it is wrong/very wrong if they drank alcohol regularly (at least once or twice per month).....	48
Table 97.	Percentage of students who said police would catch kids drinking alcohol in the neighborhood	49

Marijuana

Other Drugs

Table 114.	Percentage of students who used any form of cocaine, including powder, crack, or freebase, 1 or more times during their life.....	57
Table 115.	Percentage of students who sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high 1 or more times during their life	58
Table 116.	Percentage of students who used heroin 1 or more times during their life	58
Table 117.	Percentage of students who used methamphetamines 1 or more times during their life	59
Table 118.	Percentage of students who used ecstasy 1 or more times during their life	59
Table 119.	Percentage of students who have taken a prescription drug (such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax) without a doctor's prescription 1 or more times during their life	60
Table 120.	Percentage of students who used prescription drugs (such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax) in the last 30 days without a doctor's prescription	60
Table 121.	Percentage of students who think it is sort of or very easy to get prescription drugs (such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax) without a prescription	61
Table 122.	Percentage of students who think it is wrong or very wrong for someone the same age to use prescription drugs (such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax) without a prescription	61
Table 123.	Percentage of students who took steroid pills or shots without a doctor's prescription 1 or more times during their life	62
Table 124.	Percent of students who feel it would be sort of easy or very easy to get drugs like cocaine, LSD, amphetamines, or any other illegal drug, if they wanted	62
Table 125.	Percentage of students who were offered, sold, or given an illegal drug on school property during the past 12 months.....	63

Substance Use Prevention

Table 126.	Percentage of students who talked with parent about the dangers of tobacco, alcohol, or drug use during the past 12 months.....	63
Table 127.	Percentage of students who heard, read, or watched an advertisement about preventing tobacco, alcohol, or other drug use sometimes or a lot in past 12 months.....	64

Sexual Health

Table 128.	Percentage of students who ever had sexual intercourse	64
Table 129.	Percentage of students who had sexual intercourse for the first time before the age of 13	65
Table 130.	Percentage of students who had sexual intercourse with 4 or more people during their life.....	65
Table 131.	Percentage of students who had sexual intercourse with 1 or more people during the past 3 months.....	66
Table 132.	Among students who had sexual intercourse during the past 3 months, the percentage who drank alcohol or used drugs before last sexual intercourse.....	66
Table 133.	Among students who had sexual intercourse during the past three months, the percentage who used a condom during last sexual intercourse	67
Table 134.	Among students who had sexual intercourse during the past 3 months, the percentage who used birth control pills to prevent pregnancy before last sexual intercourse.....	67
Table 135.	Among students who had sexual intercourse during the past 3 months, the percentage who used no method of birth control to prevent pregnancy before last sexual intercourse	68

Healthcare

Table 136.	Percentage of students who saw a dentist or dental hygienist for a check-up, exam, teeth cleaning, or other dental work within the past 24 months	68
Table 137.	Percentage of students who saw a dentist or dental hygienist for a check-up, exam, teeth cleaning, or other dental work within the past 12 months	69

Table 157.	Percentage of students who sleep 8 or more hours per night on average school nights	79
Table 158.	Percentage of students who feel the rules in their family are clear.....	79
Table 159.	Percentage of students who could ask parents/guardians for help with a personal problem	80
Table 160.	Percentage of students who used indoor tanning device in the past 12 months	80
Table 161.	Percentage of students who participated on organized community services as a non-paid volunteer 1 or more times during the past 30 days	81

Understanding Healthy Kids Colorado Survey Boulder Valley School District (BVSD) High School Results

Background

The [Healthy Kids Colorado Survey](#) (HKCS) collects anonymous health information from middle and high school students throughout the state. HKCS is conducted during odd-numbered years, most recently in the fall of 2015. More than 40,000 students in 252 middle and high schools participated in the fall 2015 survey. The questionnaire measures a wide range of health behaviors that affect a student's health, including physical activity, nutrition, health care, bullying, mental health, tobacco and substance use, sexual health (high school only), and family and school protective factors. HKCS is supported by the Colorado Department of Public Health and Environment (CDPHE), Colorado Department of Education (CDE), and Colorado Department of Human Services (CDHS). The survey is administered by the University of Colorado Anschutz Medical Campus by the Community, Epidemiology & Program Evaluation Group (CEPEG). In 2015, Boulder County Public Health participated on the HKCS Advisory Board and served as a liaison between the state HKCS survey administrators and local partners, primarily Boulder Valley School District (BVSD). In 2015, the high school sampling methodology differed from the middle school sampling methodology, so this introduction focuses on the middle school results that follow. See the “2015 BVSD Middle School Results Tables” at [BoulderCountyHKCS.org](#) for the middle school methodology and results.

Questionnaire, Parental Consent, and Survey Administration

The majority of HKCS questions are drawn from the Centers for Disease Control and Prevention (CDC) Youth Risk Behavior Surveillance System, the nation's largest adolescent health survey, which has been ongoing for more than 20 years. Other questions included in the HKCS have been added with community input to meet additional data needs in Colorado.

The questionnaire is available in English and Spanish and takes about 45 minutes, or one class period, to complete by paper and pencil. Teachers are given a script to read to students that emphasizes the anonymous and voluntary nature of the survey. Parental consent procedures are followed according to each district's guidelines, with a minimum of two weeks notification in advance of the administration date. Parents of BVSD students can opt-out their student by completing a paper form and returning it electronically, in a postage-paid envelope, or verbally by phone.

Students are ineligible to participate if they are unable to complete the survey in English or Spanish or because of disabilities. If a parent chooses not to allow their child to participate, or if the student declines to participate, they are asked to sit quietly at their desk and work on other school work.

There are two versions of the high school questionnaire, called “modules,” that have an identical “core” set of questions plus additional questions unique to each version. This approach allows more information to be collected while limiting the survey length. Modules A and B contain 107 and 108 questions, respectively. The modules are randomly distributed, so roughly half the students in each classroom complete Module A and half complete Module B.

For the high school survey, the state HKCS team selected a sample of schools to represent the 21 Health Statistics Regions across state of Colorado. Within selected schools, a sample of classrooms was selected to participate in order to minimize the time commitment from schools. The results from the regional sample were weighted to BVSD demographics in order to be representative of the BVSD student population.

2015 HEALTHY KIDS COLORADO SURVEY
BOULDER VALLEY SCHOOL DISTRICT HIGH SCHOOL RESULTS

Table 148. Percentage of students who think it is important or very important to finish high school

		Percentage (%)*	95% Confidence Interval
	Total	98.9	(97.9 - 99.9)
Sex	Female	100.0	(99.9 - 100.0)
	Male	98.2	(96.9 - 99.5)
Grade	9th	.	(. - .)
	10th	99.2	(97.5 - 100.0)
	11th	97.8	(96.4 - 99.2)
	12th	99.0	(97.1 - 100.0)

- A. **Health behavior** includes the Table Number and a description of the behavior being reported.
- B. **Percentage:** Estimated percentage of students who reported a given behavior or answer. A period (.) appears whenever results meet the suppression criteria and are not shown to protect student confidentiality. See Key Definitions below.
- C. **95% confidence interval (CI):** These numbers define the range that most likely contains the true percentage for your district. These intervals are also called “margins of error” and indicate the precision of the estimate – a larger range indicates less precision, a smaller range indicates more precision.

Key Definitions

Weighting: The results in the current report are adjusted (“weighted”) so that the answers can represent all students in the district. The process of weighting takes into account each participating student’s probability of selection and matches the participant group to the total enrollment by grade, gender, and race/ethnicity.

Response Rates: District response rate is the total number of students who participated in the survey divided by the number of students within BVSD randomly chosen to take the survey. Generally, the higher the response rate, the more confidence that the survey results reflect the student population. Student response rates of 80% or higher are very desirable and increase confidence that the results are representative of the entire student population.

Confidentiality: In order to protect confidentiality, student responses are not released if they might allow someone to identify individual students. A period (.) appears whenever results meet certain “suppression” criteria used to maintain confidentiality. Our suppression criteria include results of 0% or 100%; results where the numerator has 3 or fewer students (i.e., the number of students who reported a given behavior or answer), or the number in the denominator is 30 or fewer (i.e., the number of students who answered the question).

Considerations When Interpreting Results

The results presented here are snapshot estimates of population-level behavior. They can be used to make general observations and as soft guidance, supplemented with other sources of information and expertise.

Generalizability: The results are generalizable to the entire district population from which the sample was selected and weighted.

Comparability: The comparison to results within the same administration year, to previous years, and to other geographies are intended to be general observations only; due to differences in survey methodology, statistically significant differences cannot be inferred. Specifically, middle school and high school results are not comparable because question scope, wording, and response options vary. It is not possible to identify time trends, as a trend requires three distinct data points. While effort was made to align with CDC protocol and past local processes, the shifts in roles, methodology, and environment make pre-2013 results not comparable to results from 2013 and beyond. Results of the 2017, 2015, and 2013 HKCS may be used to identify trends.

Confidence: While in the past, statistically significant differences were identified solely based on non-overlapping confidence intervals, the 2015 sampling frame unintentionally resulted in some very wide confidence intervals. The percentages are still accurate, but they are not precise. As an alternative to using confidence intervals, there are statistical analyses to identify high-risk groups or track progress, but these are very complex. A simpler method is to look for patterns over multiple data points to identify a higher-risk sub-population even if there is not statistical significance for individual points.
