Crestone Peak Resources Operating, LLC

Cause No. 1
Docket No. 170500189

CPRO Exhibit 2
Crestone Peak Resources Operating LLC ("Crestone") submits the following conceptual information at the request of the COGCC. Pursuant to the COGCC process established for this Rule 216 CDP application, this conceptual submission will be followed by a revised preliminary submission, which will in turn be followed by Crestone's final CDP application. Crestone provides this Initial Submittal as conceptual rendering only to aid in facilitating stakeholder discussions pursuant to the CDP permitting process. Any specifications in this depiction may change at Crestone's sole discretion without notice at any time prior to filing its final CDP application. The features, plans and areas depicted are proposed only based on current information, and Crestone reserves the right to modify, revise or withdraw any or all of the same in its sole discretion and without prior notice.

(1) A U.S. Geological Survey 1:24,000 topographic map showing the proposed oil and gas locations, including proposed access roads and gathering systems reasonably known to the operator(s);

See Attachment A.

(2) A current aerial photo showing the proposed oil and gas locations displayed at the same scale as the topographic map to facilitate use as an overlay;

See Attachment B.

(3) Overlay maps showing the proposed oil and gas locations, including all proposed access roads and gathering systems, drainages and stream crossings, and existing and proposed buildings, roads, utility lines, pipelines, known mines, oil or gas wells, water wells known to the operator(s) and those registered with the State Engineer's Office, and riparian areas;

<Due in the Preliminary Submission>

(4) A list of all proposed oil and gas facilities to be installed within the area covered by the Comprehensive Drilling Plan over the time of the Plan and the anticipated timing of the installation;

As described in each of Crestone's Drilling and Spacing Unit applications, Crestone intends to develop the minerals within the boundaries of the CDP as efficiently and thoroughly as possible using the current drilling and completions technology. To achieve this goal, Crestone believes it is economically and technically feasible to drill 36 horizontal wells from six independent well pads for a total of 216 possible wells within the CDP Area. Each horizontal lateral of the individual wells will be approximately two miles in length. This calculation of wells is based on the assumptions as described. If any of these assumptions change, the total well count will also change.

Crestone's conceptual plan is based on all surface disturbance being contained within the shaded areas titled 'Proposed Development Area' of the maps provided, Item (1) above. This surface disturbance includes access roads, well pads, well pad facilities, and all pipelines.
If the central Proposed Development Area (PDA) is utilized for certain Oil and Gas Locations, then the surface disturbance may include:

- Six to twelve Oil and Gas Locations, each with the equipment and facilities required to separate the gas and liquid production to allow the liquids to flow by pipeline to Crestone’s centralized production hub.

- The central PDA is the primary focus of Crestone’s conceptual planning and review process due to the ability to develop both the northern and southern sections of the CDP from well sites located in this area. If Crestone Peak can locate all Oil and Gas Locations in the central PDA, it may be able to avoid utilizing any of the northern PDA. While this is premature in this phase of the project to make that determination, consolidated, larger facilities in the central PDA may be necessary to ensure that the minerals in the northern and southern sections of the proposed drilling and spacing units are responsibly developed and Crestone Peak can locate and orient the horizontal wells in the central PDA for optimal development of such minerals.

If the northern Proposed Development Area is utilized for certain Oil and Gas Locations, then the surface disturbance may include:

- Three to six Oil and Gas Locations, each with the equipment and facilities required to separate the gas and liquid production to allow the liquids to flow by pipeline to Crestone’s centralized production hub.

- Technical limitations require Crestone Peak to site Oil and Gas Locations in the central PDA, even if the northern PDA is utilized for Oil and Gas Locations, to ensure the minerals in the southern sections of the proposed drilling and spacing units are responsibly developed and Crestone Peak can locate and orient the horizontal wells for optimal development.

The production from the wells drilled and completed as part of this Plan is intended to be handled two ways. The gas would be separated from the liquids on the well pad using a separator for each well. The gas stream would be metered and custody transferred at the well pad to Crestone’s third party gas gathering company. The produced liquids, including the oil and condensate, would be transported by pipeline to Crestone’s production gathering facility, or the Hub. The Hub is in Weld County at the intersection of Weld County Road 7 and Road 6. All of the well pads anticipated within the CDP Area would tie into the Hub and therefore are considered “tank-less”.

Crestone uses third party waste disposal for all E&P waste produced during our development activities. Crestone does not currently own and does not intend to permit a UIC well.

Due to the nature of the CDP proposal and overall development of the CDP, Crestone has not executed a Surface Use Agreement or Right of Way Agreement as part of this development plan for any well pads, production facilities, access roads, or pipelines. Crestone Peak anticipates that
such agreements and easements will occur after the Oil and Gas Locations within the CDP Area are determined as part of the CDP development process.

While conceptual in nature, not binding in any way, and subject to change as this process and as the required permitting processes for any development within the CDP Area progress, Crestone Peak, upon receipt of any and all necessary federal, state and local permits, allowances and approvals within the CDP Area and proposed drilling and spacing units, anticipates that full development of the CDP Area and underlying minerals could take approximately 6.7 years.

(5) A plan for the management of exploration and production waste;

E&P petroleum impacted soils, drill cuttings, drilling mud, and tank bottoms will be disposed of at a licensed third party disposal facilities. Liquid wastes including flow back and produced water will be disposed of at a licensed third party injection facility.

- Third Party Disposal Facilities
  - Waste Management
    - Buffalo Ridge Landfill – Keenesburg, Colorado
    - North Weld Landfill – Ault, Colorado
  - Republic Services
  - Waste Connections
    - Denver Regional Landfill - Erie, Colorado
  - Expedition Water Solutions - EWS #1, 2, & 3
  - NGL Water Solutions

(6) A description of the wildlife resources at each oil and gas location;

See Attachment C.
(7) Wildlife information that is determined necessary after consultation with the Colorado Parks and Wildlife;

<Due in the Preliminary Submission>

(8) Locations of all proposed reference areas to be used as guides for interim and final reclamation;

<Due in the Final Submission>

(9) Past economic uses to which the land has been put in the previous ten (10) years reasonably known to the operator(s);

The CDP Area has been utilized for oil and gas development as evidenced by the existing number of oil and gas wells within the boundary of the CDP Area. There are no existing agreements with local governments that apply to oil and gas exploration and production activities within the proposed CDP Area, however, Crestone Peak is in close contact and communication with Boulder County and the Town of Erie regarding the CDP development proposal. Boulder County informed Crestone Peak that the area is also utilized for agricultural development.

(10) Any planned variance requests that are reasonably known to the operator;

Due to the nature of this CDP proposal, at this time Crestone Peak cannot confirm any known or anticipated variance requests for the CDP Area since the Oil and Gas Locations are neither known or confirmed. Crestone Peak, however, can reasonable foresee that it may have variance requests related to the Commission’s 1000 series rules.

(11) Proposed best management practices or mitigation to minimize adverse impacts to resources such as air, water, or wildlife resources; and

Crestone does not anticipate locating any Oil and Gas Location within a Designated Setback Location or Urban Mitigation Area.

(12) A list of all parties that participated in creating the Comprehensive Drilling Plan pursuant to Rule 216.d.(2).

Crestone Peak is in the initial stages of creating the CDP and provides, for purposes of this Conceptual submittal, the list of Interested parties receiving a copy of the original CDP Application and Amended CDP Application:

State Agencies:
Colorado Oil and Gas Conservation Commission
Colorado Department of Public Health and Environment
Colorado Parks and Wildlife
Colorado Department of Transportation
Colorado State Land Board
Local Governments within CDP Application Lands:
- Boulder County
- Town of Erie

Working Interest Owners – Courtesy Copy:
- Extraction Oil and Gas, Inc.
- Anadarko Petroleum Company

Surface owners within CDP Application Lands:
Crestone Peak notified the known surface owners within the CDP Area as shown on the Boulder County Assessor’s webpage. The known surface owners are listed on Attachment D. Pursuant to Rule 216, Crestone Peak notified the known surface owners within the CDP Application Lands, however, for purposes of “participating” parties in any final CDP, Crestone Peak intends to focus on those surface owners owning the surface upon which an Oil and Gas Location may be sited and such adjoining surface owners.

In addition to the above-listed parties receiving a copy of the original CDP Application and Amended CDP Application, the following parties also received applications for the three drilling and spacing units associated with the overall CDP proposal:

- Ralsa DJ Basin I, LP
  1580 Lincoln Street, Suite 1110
  Denver, CO 80201

- Martin J. Harrington

Rule 216.d.(1): A proposed Comprehensive Drilling Plan shall describe the operator’s reasonably foreseeable oil and gas development activities. Specifically, to “Identify Applicant’s mineral ownership percentage within the CDP area using color-coding to indicate the following tiers: 0%, 1-49%, 50-99%, 100%”.

Crestone Peak is in the process of obtaining and analyzing record title ownership of the mineral and leasehold interest within the CDP Area. For purposes of this conceptual submittal, Crestone Peak’s working interest ownership percentage within each DSU (that covers the entirety of the CDP Application Lands) is as follows:

- DSU #1: 45.05%
- DSU #2: 49.12%
- DSU #3: 19.56%

Crestone owns a total of approximately 37.9% working interest in the entire CDP Application Lands. Crestone Peak will continue to revise and supplement its ownership as the record title ownership analysis progresses. Crestone Peak has partial undivided leasehold interests in each of the three (3) DSUs comprising the CDP Application Lands.
