

## Zoonotic Disease Report June 25 – July 1, 2017 (Week 26)

### Executive Summary

- CDPHE announced the first human positive for WNV from Jefferson County.
- The first mosquito pool statewide tested positive for WNV in Larimer County this week.
- Nuisance mosquito species counts are slightly higher than average across the county for this week while vector mosquito species counts are below average.
- Seven mosquito pools were submitted for testing for WNV this week, all testing negative.
- One bat was submitted for rabies, testing negative.
- Statewide 79 specimens have tested positive for rabies in 2017 including two domestic dogs in Yuma and Weld Counties. This compares with 88 total positive specimens in 2016.
- Colorado rabies positive specimens 2017: Skunk (51), Bat (20), Dog (2), Fox (5), Coyote (1)
- No specimens have been submitted for plague, tularemia, or hantavirus testing.

Information about symptoms, transmission, and prevention is always available at [BoulderCountyVector.org](http://BoulderCountyVector.org)

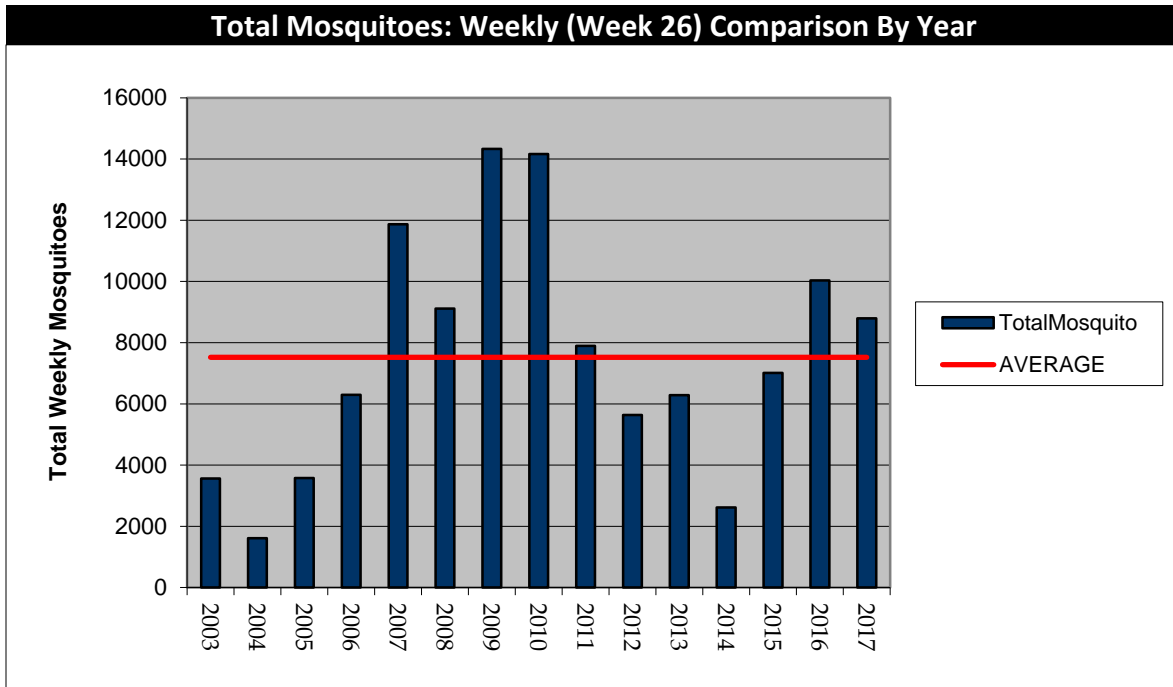

### West Nile Virus (WNV) Activity

SEASON-TO-DATE HUMAN WEST NILE VIRUS (WNV) ACTIVITY			
Location	Non-Neuroinvasive Disease Cases	Neuroinvasive Disease Cases	Deaths
<b>Boulder County</b>	0	0	0
<b>Colorado</b>	1	0	0
<b>United States</b>	***	***	***

NOTE: Numbers in **red** signify an increase from the previous week.

\*\*\* Indicates incomplete data

## Mosquito Activity

## West Nile Virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile Virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District’s adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

**NOTE: (\*\*\*) indicates that every pools submitted for that zone tested positive, therefore an infection rate and vector index for that zone cannot be calculated.**

VECTOR INDEX			
Season Week	ZONE 1	ZONE 2	ZONE 3

## Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

### Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health, other agencies or private veterinary practices.
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (\*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
