

Zoonotic Disease Report September 03 – September 09, 2017 (Week 36)

Executive Summary

- The first Colorado WNV death was reported this week from a resident in Ft. Collins.
- Boulder County reports one new human WNV cases bringing the total to three cases this season.
- CDPHE reports 21 WNV cases from 11 counties.
- CDC reports 526 WNV cases and 20 deaths nationally from 37 states.
- Texas is now dealing with a surge of mosquitoes as a result of flooding from Hurricane Harvey.
- Two bats were tested for rabies this week, both testing negative. One raccoon was submitted for rabies testing and deemed untestable.
- Statewide 123 specimens have tested positive for rabies in 2017 including two domestic dogs. This compares with 88 total positive specimens in 2016.
- Colorado rabies positive specimens 2017: Skunk (64), Bat (51), Dog (2), Fox (5), Coyote (1).
- No specimens were submitted for plague, tularemia, or hantavirus testing.

Information about symptoms, transmission, and prevention is always available at BoulderCountyVector.org

West Nile Virus (WNV) Activity

SEASON-TO-DATE HUMAN WEST NILE VIRUS (WNV) ACTIVITY			
Location	Non-Neuroinvasive Disease Cases	Neuroinvasive Disease Cases	Deaths
Boulder County	1	2	0
Colorado	***	***	1
United States	223	303	20

NOTE: Numbers in red signify an increase from the previous week.

*** Indicates incomplete data

Mosquito Activity

***NOTE: Data are incomplete as some programs have discontinued surveillance.

***NOTE: Data are incomplete as some programs have discontinued surveillance.

West Nile Virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile Virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District's adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

VECTOR INDEX			
	ZONE 1	ZONE 2	ZONE 3

Week 35	----	----	----
Week 36	----	----	----

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health, other agencies or private veterinary practices.
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
