Work in Progress/Completed

1. Site visit with EWP QA team to go over construction progress in preparation to revegetation effort.

2. Floodplain soil conditioning between main channel St. 94+75 to 99+80 completed.

3. Construction of riffle crest, face and pool at main channel St. 91+43 and 88+02 in progress.

4. Completed installation of instream Type 1 large woody structure (priority 1) at main channel St. 92+50 left bank.

5. Installation of instream Type 2 large woody structure (priority 1) at main channel St. 89+90 and 90+40 right bank in progress.

6. Staging large woody materials and specified rock mix at different allocated areas for ease of construction.

7. Floodplain benching, fine grading and soil conditioning between main St. 73+50 to 94+75 in progress.

9. Completed fine grading and soil conditioning of revised overflow channel C profile.

10. Fine Grading i.e. low flow, pool and bankline between main channel St. 94+50 to 99+00 in progress.

11. Cobble toe bank stabilization feature between main channel St. 99+40 to 97+00 right bank completed.

12. Preparation for seeding and plantings in riparian and upland areas per construction plan.

13. In-situ density test of material disposed in Quarry in progress.

Upcoming Work

1. Complete installation of instream Type 2 large woody structure (priority 1) at main channel St. 89+90 and 90+40 right bank.
2. Construction of Type 1 (priority 1) large woody structure at left bank main channel St. 85+40.
3. Complete construction of riffle crest, face and pool at main channel St.91+43 and 88+02.
4. Construction of riffle crest, face and pool at main channel St. 88+02, 83+80 and 78+59.
5. Complete floodplain benching, fine grading and soil conditioning between main St. 73+50 to 94+75.
6. Complete floodplain sill in overflow channel B and A.
7. Construction of rock outfall structure in overflow channel A and B at St. 4+98 and 5+05 respectively.
8. Complete main channel fine grading, bank contours, low flow profile and instream features between main channel St 60+50 to 94+50.
9. Continue construction generated inert material haul offsite to Quarry.
10. Continue survey of channel centerline, bankline, project limits, instream and floodplain features and as-builts.

Other Notes

1. Verification of instream features and floodplain grading.
2. Field fit of several construction elements to match existing site condition.
