

Zoonotic Disease Report June 10 – June 16, 2018 (Week 24)

Executive Summary

- Statewide 194 specimens have tested positive for rabies in 2018. This surpasses total positive specimens for all of 2017.
- [2018 Colorado rabies positive specimens](#): Skunk (172), Bat (17), Raccoon (1), Cat(1), Dog (1), Alpaca (1)
- Boulder County reports only one rabies positive specimen, a skunk.
- Mosquito traps counts are well above historical averages for this week consisting of large numbers of floodwater nuisance mosquitoes.
- Testing of mosquitoes for WNV began this week. All samples tested negative.
- Two raccoons and one skunk were submitted for rabies testing, all testing negative.
- No specimens were submitted for plague, tularemia, or hantavirus testing.

Information about symptoms, transmission, and prevention is always available at BoulderCountyVector.org

West Nile virus (WNV) Activity

SEASON-TO-DATE HUMAN WEST NILE VIRUS (WNV) ACTIVITY			
Location	Non-Neuroinvasive Disease Cases	Neuroinvasive Disease Cases	Deaths
Boulder County	0	0	0
Colorado	0	0	0
United States	***	***	***

NOTE: Numbers in **red** signify an increase from the previous week.

*** No reported 2018 data

Mosquito Activity

West Nile virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District’s adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health, other agencies or private veterinary practices.
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
