TABLE OF CONTENTS

Introduction

Background	i
Questionnaire, Parent Consent, and Survey Administration Background	i
EXAMPLE: How to Read a Table	ii
Key Definitions.....	iii
For More Information	iii

Body Weight

Table 2. Percentage of students who were obese (i.e., at or above the 95th percentile for body mass index, by age and gender)	2
Table 3. Percentage of students who were overweight (i.e., at or above the 85th percentile but below the 95th percentile for body mass index, by age and gender).....	3
Table 4. Percentage of students who were overweight or obese (i.e., at or above the 85th percentile for body mass index, by age and gender)	4
Table 5. Percentage of students who were underweight (i.e., below the 5th percentile for body mass index, by age and gender).....	5
Table 6. Percentage of students who described themselves as slightly or very overweight	6
Table 7. Percentage of students who were trying to lose weight	7

Physical Activity

Table 8. Percentage of students who were physically active for a total of at least 60 minutes per day on five or more of the past 7 days	8
Table 9. Percentage of students who watched three or more hours of TV on an average school day	9
Table 10. Percentage of students who played video or computer games, spent time on social media, or used a computer for something that was not school work for three or more hours on an average school day.....	10
Table 11. Percentage of students who have 3 or more hours total screen time on average school day	11
Table 12. Percentage of students who played on one or more sports teams during the past 12 months	12
Table 13. Percentage of students who could walk or ride a bike, scooter, or skateboard to school	13
Table 14. Percentage of students who walk or ride to school one or more days in an average week	14
Table 15. Percentage of students who attended physical education (PE) classes on one or more days in an average week	15

Nutrition

Table 16. Percentage of students who ate fruit one or more times per day in the past 7 days	16
---	----

Table 17.	Percentage of students who ate fruit two or more times per day in the past 7 days	17
Table 18.	Percentage of students who ate vegetables one or more times per day in the past 7 days	18
Table 19.	Percentage of students who ate vegetables two or more times per day in the past 7 days	19
Table 20.	Percentage of students who drank a can, bottle, or glass of soda or pop one or more times per day during the past 7 days ..	20
Table 21.	Percentage of students who drank a can, bottle or glass of sports drink one or more times in the last 7 days	21
Table 22.	Percentage of students who drank a can, bottle, or glass of an energy drink one or more times in the last 7 days	22
Table 23.	Percentage of students who drank a can, bottle, or glass of diet of diet soda one or more times in the last 7 days	23
Table 24.	Percentage of students who drank a can, bottle, or glass of another sweetened beverage one or more times in the last 7 days	24
Table 25.	Percentage of students who drank a can, bottle, or glass of water one or more times in the last 7 days	25
Table 26.	Percentage of students who ate breakfast on all of the past 7 days	26
Table 27.	Percentage of students who went hungry in the last 30 days sometimes, most of the time, or always because of lack of food at home	27

Bullying

Table 28.	Percentage of students who had ever been bullied on school property during the past 12 months	28
Table 29.	Percentage of students who had ever been electronically bullied during the past 12 months	29
Table 30.	Percentage of students who have been a victim of teasing or name calling because of their actual or perceived race or ethnic background	30
Table 31.	Percentage of students who have been a victim of teasing or name calling because of their actual or perceived sexual orientation	31
Table 32.	Percentage of students who have been a victim of teasing or name calling because of their actual or perceived gender identity	32
Table 33.	Percentage of students who have been a victim of teasing or name calling because of their actual or perceived disability status	33

Violence

Table 34.	Percentage of students who carried a weapon such as a gun, knife, or club on school property on one or more of the past 30 days	34
Table 35.	Percentage of students who did not go to school on one or more of the past 30 days because they felt would be unsafe at school or on their way to or from school	35
Table 36.	Percentage of students who had been threatened or injured with a weapon such as a gun, knife, or club on school property one or more times during the past 12 months	36
Table 37.	Percentage of students who were in a physical fight one or more times during the past 12 months	37
Table 38.	Among students who dated or went out with someone during the past 12 months, the percentage who had been physically	

hurt on purpose by someone they were dating or going out with one or more times during the past 12 months.....	38
Table 39. Percentage of students who had ever been physically forced to have sexual intercourse when they did not want to	39

Mental Health

Table 40. Percentage of students who felt so sad or hopeless almost every day for two weeks or more in a row during the past 12 months that they stopped doing some usual activities	40
Table 41. Percentage of students who purposefully hurt themselves without wanting to die in the past 12 months	41
Table 42. Percentage of students who seriously considered attempting suicide during the past 12 months	42
Table 43. Percentage of students who made a plan about how they would attempt suicide during the past 12 months	43
Table 44. Percentage of students who attempted suicide one or more times during the past 12 months	44
Table 45. Percentage of students who have an adult to go to for help with a serious problem	45
Table 46. Percentage of students who have someone to talk to when feeling sad, empty, hopeless, angry, or anxious	46

Safety

Table 47. Percentage of students who rode on one or more times during the past 30 days in a car or other vehicle driven by someone who had been drinking alcohol.....	47
Table 48. Among students who drove a car or other vehicle during the past 30 days, the percentage who drove when they had been drinking alcohol one or more times during the past 30 day	48
Table 49. Percentage of students who rode one or more times during the past 30 days in a car or other vehicle driven by someone who had been using marijuana	49
Table 50. Among students who drove a car or other vehicle during the past 30 days, the percentage who drove when they had been using marijuana one or more times during the past 30 days	50
Table 51. Percentage of students who never or rarely wore a seat belt when riding in a car driven by someone else	51
Table 52. Among students who drove a car or other vehicle during the past 30 days, the percentage who texted or e-mailed while driving on one or more of the past 30 days	52

Tobacco

Table 53. Percentage of students who have ever smoked a whole cigarette	53
Table 54. Percentage of students who smoked a whole cigarette for the first time before age 13 years	54
Table 55. Percentage of students who smoked cigarettes on one or more of the past 30 days	55
Table 56. Percentage of students who smoked cigarettes on 20 or more of the past 30 days	56

Table 57.	Percentage of students who think it would be sort of easy or very easy to get cigarettes if they wanted	57
Table 58.	Among students who were less than 18 years of age and who reported current cigarette use and got cigarettes in the past 30 days, the percentage who usually got their own cigarettes by buying them in a gas station, convenience store, grocery store, or drugstore during the past 30 days.....	58
Table 59.	Among students who reported current cigarette use, the percentage who ever tried to quit smoking cigarettes during the past 12 months	59
Table 60.	Percentage of students who think people who smoke one or more packs of cigarettes per day have a moderate or great risk of harm	60
Table 61.	Percentage of students who think it is wrong or very wrong for someone of the same age to smoke cigarettes	61
Table 62.	Percentage of students who think adults in their neighborhood think it is wrong/very wrong for kids to smoke cigarettes ..	62
Table 63.	Percentage of students who have used other tobacco products (cigar, chewing tobacco, snus, waterpipe, or bidis) in the past 30 days	63
Table 64.	Percentage of students who definitely or probably will use an electronic vapor product if one of their best friends offers it	64
Table 65.	Percentage of students who definitely or probably will use an electronic vapor product anytime in the next year	65
Table 66.	Percentage of students who have ever used an electronic vapor product	66
Table 67.	Percentage of students who used an electronic vapor product in the past 30 days	67
Table 68.	Percentage of students who smoked cigarettes, e-vapor products or used other tobacco products on one or more of the past 30 days	68
Table 69.	Percentage of students who feel it would be sort of easy or very easy to get electronic vapor products if they wanted	69
Table 70.	Among students who were less than 18 years of age and who reported current electronic vapor product use, the percentage who usually got their own electronic vapor products by buying them in a gas station, convenience store, grocery store, or drugstore during the past 30 days.....	70
Table 71.	Percentage of students who think people who use electronic vapor products every day have a moderate or great risk of harm	71
Table 72.	Percentage of students who were inside their homes while someone was smoking a cigarette, cigar, or pipe, or using an electronic vapor product for one or more days in the past 7 days.....	72
Table 73.	Percentage of students who were inside their car while their parent or guardian was smoking a cigarette, cigar, or pipe, or using an electronic vapor product for one or more days in the past 7 days	73
Table 74.	Percentage of students who think breathing second hand vapor has moderate or great risk.....	74
Table 75.	Percentage of students who think breathing second hand smoke has a moderate or great risk.....	75
Alcohol		
Table 76.	Percentage of students who ever had at least one drink of alcohol.....	76
Table 77.	Percentage of students who had their first drink of alcohol, other than a few sips, before the age of 13	77

Table 78.	Percentage of students who had at least one drink of alcohol on one or more of the past 30 days	78
Table 79.	Percentage of students who binge drank (4+ drinks for females, 5+ drinks for males, within a couple of hours) on one or more of the past 30 days	79
Table 80.	Percentage of students who think a typical student drank one or more days in the past few days	80
Table 81.	Percentage of students who think a typical student binge drank one or more days in the past 30 days	81
Table 82.	Percentage of students who feel it would be sort of easy or very easy to get alcohol if they wanted	82
Table 83.	Among students who reported current alcohol use, the percentage who usually got the alcohol they drank from someone who gave it to them during the past 30 days	83
Table 84.	Among students who reported current alcohol use, the percentage who usually drank in a public setting, on school property, or riding in a car	84
Table 85.	Percentage of students who think people who have one or two drinks nearly every day have moderate or great risk of harming themselves	85
Table 86.	Percentage of students who think it is wrong or very wrong for someone same age to drink alcohol regularly (once or twice per month)	86
Table 87.	Percentage of students who think their parents would feel it is wrong or very wrong if they drank alcohol regularly (at least once or twice per month).....	87
Table 88.	Percentage of students who think adults (over 21) in their neighborhood think it is wrong or very wrong for kids to drink alcohol	88
Table 89.	Percentage of students who think police would catch kids drinking alcohol in the neighborhood.....	89
Table 90.	Percentage of students who said parent would catch them if they drank beer, wine or hard liquor without permission.....	90

Marijuana

Table 91.	Percentage of students who used marijuana one or more times during their lives	91
Table 92.	Percentage of students who tried marijuana for the first time before age 13 years.....	92
Table 93.	Percentage of students who used marijuana one or more times during the past 30 days	93
Table 94.	Among students who used marijuana in the past 30 days, the percentage who smoked it	94
Table 95.	Among students who used marijuana in the percentage who ate it	95
Table 96.	Among students who used marijuana in the past 30 days, the percentage who vaporized it	96
Table 97.	Among students who used marijuana in the past 30 days the percentage who dabbed it	97
Table 98.	Among students who used marijuana in the past 30 days, the percentage that usually smoked it.....	98
Table 99.	Percentage of students who feel it would be sort of easy or very easy to get marijuana if they wanted	99
Table 100.	Among students who used marijuana l the past 30 days, the percentage that usually got it from an adult	100
Table 101.	Percentage of students who used marijuana on school property during the past 30 days	101
Table 102.	Percentage of students who think a typical student used marijuana during the past 30 days	102
Table 103.	Percentage of students who think people who use marijuana regularly have moderate or great risk of harm	103

Table 104. Percentage of students who think it is wrong or very wrong for someone the same age to use marijuana	104
Table 105. Percentage of students who think their parents feel it is wrong or very wrong if they used marijuana	105
Table 106. Percentage of students who think adults in their neighborhood think it is wrong or very wrong for kids to use marijuana ..	106
Table 107. Percentage of students who think police would catch kids using marijuana in the neighborhood.....	107

Other drugs and substance use prevention

Table 108. Percentage of students who used any form of cocaine one or more times during their life	108
Table 109. Percentage of students who sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high one or more times during their life	109
Table 110. Percentage of students who used heroin one or more time during their life	110
Table 111. Percentage of students who used methamphetamines one or more times during their life	111
Table 112. Percentage of students who used ecstasy one or more time during their life	112
Table 113. Percentage of students who have taken a prescription pain medicine (such as codeine, Vicodin, OxyContin, Hydrocodone, and Percocet) without a doctor’s prescription one or more times during their life	113
Table 114. Percentage of students who used prescription drugs (such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax), without a doctor’s prescription, in the last 30 days	114
Table 115. Percentage of students who think it is sort of or very easy to get prescription drugs without a prescription.....	115
Table 116. Percentage of students who think it is wrong or very wrong to use prescription drugs without a prescription	116
Table 117. Percentage of students who feel it would be sort of easy or very easy to get drugs like cocaine, LSD, amphetamines if they wanted	117
Table 118. Percentage of students who were offered, sold, or given drugs at school during the past 12 months	118
Table 119. Percentage of students who think their family has clear rules about alcohol and drug use	119

Sexual Health

Table 120. Percentage of students who ever had sexual intercourse	120
Table 121. Percentage of students who had sexual intercourse for the first time before age 13 years	121
Table 122. Percentage of students who had sexual intercourse with four or more people during their lifetime	122
Table 123. Percentage of students who had sexual intercourse with one or more people during the past three months	123
Table 124. Among students who had sexual intercourse during the past three months, the percentage who drank alcohol or used drugs before last sexual intercourse.....	124
Table 125. Among students who had sexual intercourse during the past three months, the percentage who used a condom during the last sexual intercourse	125
Table 126. Among students who had sexual intercourse during the past three months, the percentage who used birth control pills to prevent pregnancy before last sexual intercourse	126
Table 127. Among students who had sexual intercourse during the past three months, the percentage	

who used no method of birth control to prevent pregnancy before last sexual intercourse.....	127
--	-----

Healthcare

Table 128. Percentage of students who saw a doctor or nurse for a physical exam or check-up within the past 24 months	128
Table 129. Percentage of students who saw a doctor or nurse for a physical exam or check-up within the past 12 months	129
Table 130. Percentage of students who had a dental exam within the past 24 months	130
Table 131. Percentage of students who had a dental exam within the past 12 months	131
Table 132. Percentage of student who had ever been told by a doctor or nurse that they had asthma	132

School

Table 133. Percentage of students who described their grades as mostly A's or B's over the past 12 months	133
Table 134. Percentage of students who think their grades are better than most students in class	134
Table 135. Percentage of students who participate in extracurricular activities at school	135
Table 136. Percentage of students who skipped 1+ whole days of school during last 4 weeks	136
Table 137. Percentage of students who feel school work/assignments are often/almost always important and meaningful	137
Table 138. Percentage of students who feel safe at school.....	138
Table 139. Percentage of students who think their school lets their parents/guardians know when they have done something well.....	139
Table 140. Percentage of students who think their teacher notices when doing a good job and lets them know about it.....	140
Table 141. Percentage of students who think their teacher will praise them when they work hard in school	141
Table 142. Percentage of students who think most of their classes are fairly/quite/very interesting and stimulating.....	142
Table 143. Percentage of students who think the things they are learning in school are going to be important for later in life.....	143
Table 144. Percentage of students who often or almost always hated being in school over the last year	144
Table 145. Percentage of students who often try to do their best work in school over the last year	145
Table 146. Percentage of students who often enjoyed being in school over the last year	146
Table 147. Percentage of students who think it is important to finish high school	147
Table 148. Percentage of students think it is important to go to college	148

Home Life

Table 149. Percentage of students who feel the rules in their family are clear.....	149
Table 150. Percentage of students who could ask parents/ guardians for help with a personal problem.....	150
Table 151. Percentage of students who have parents/guardians that ask if homework is done	151
Table 152. Percentage of students who have parents/guardians who know where they are and who they are with when not home	152
Table 153. Percentage of students who have parents/guardians who know if they are not home on time	153
Table 154. Percentage of students who think they would be caught by parents for skipping school	154
Table 155. Percentage of students who have chances to do fun thSings with parents/guardians.....	155
Table 156. Percentage of students who have parents/guardians who ask student what they think before most family decisions	156

Table 157. Percentage of students who usually slept somewhere other than their parent/guardian's home in the past 30 days.....	157
Table 158. Percentage of students who sleep 8 or more hours per night on average school nights	158
Table 159. Percentage of students who participated on organized community services as a non-paid volunteer 1 or more times during the past 30 days.....	159

Understanding the Healthy Kids Colorado Survey

School and District Reports

Background.

The [Healthy Kids Colorado Survey](#) (HKCS) collects anonymous health information from middle and high school students throughout the state. HKCS is conducted during odd-numbered years, most recently in the fall of 2017. More than 40,000 students in 252 middle and high schools participated in the fall 2015 survey. The questionnaire measures a wide range of health behaviors that affect a student's health, including physical activity, nutrition, health care, bullying, mental health, tobacco and substance use, sexual health (high school only), and family and school protective factors. HKCS is supported by the Colorado Department of Public Health and Environment (CDPHE), Colorado Department of Education (CDE), and Colorado Department of Human Services (CDHS). The survey is administered by the University of Colorado Anschutz Medical Campus by the Community, Epidemiology & Program Evaluation Group (CEPEG). In 2017, Boulder County Public Health participated on the HKCS Advisory Board and served as a liaison between the state HKCS survey administrators and local partners, primarily Boulder Valley School District (BVSD).

Questionnaire, Parental Consent, and Survey Administration.

The majority of HKCS questions are drawn from the Centers for Disease Control and Prevention (CDC) Youth Risk Behavior Surveillance System, the nation's largest adolescent health survey, which has been ongoing for more than 20 years. Other questions included in the HKCS have been added with community input to meet additional data needs in Colorado.

The questionnaire is available in English and Spanish and takes about 45 minutes, or one class period, to complete by paper and pencil. Teachers are given a script to read to students that emphasizes the anonymous and voluntary nature of the survey. Parental consent procedures are followed according to each district's guidelines, with a minimum of two weeks notification in advance of the administration date. Parents of BVSD students can opt-out their student by completing a paper form and returning it electronically, in a postage-paid envelope, or verbally by phone.

Students are ineligible to participate if they are unable to complete the survey in English or Spanish or because of disabilities. If a parent chooses not to allow their child to participate, or if the student declines to participate, they are asked to sit quietly at their desk and work on other school work.

There are two versions of the high school questionnaire, called "modules," that have an identical "core" set of questions plus additional questions unique to each version. This approach allows more information to be collected while limiting the survey length. Modules A and B contain 110 and 114 questions, respectively. The modules are randomly distributed, so roughly half the students in each classroom complete Module A and half complete Module B.

For the high school survey, the state HKCS team selected a sample of schools to represent the 21 Health Statistics Regions across state of Colorado.

Within selected schools, a sample of classrooms was selected to participate in order to minimize the time commitment from schools. The results from the regional sample were weighted to BVSD demographics in order to be representative of the BVSD student population.

EXAMPLE: How to Read a Table.

2017 HEALTHY KIDS COLORADO SURVEY RESULTS
Boulder Valley School District RE-2

Number of Responses: 994

Table 129. Percent of students who saw a doctor or nurse for a physical exam or check-up within the past 12 months

		Percentage (%)*	95% Confidence Interval
	Total	76.2	(70.5 - 81.9)
Sex	Female	76.4	(72.1 - 80.8)
	Male	75.6	(68.0 - 83.2)

- A. Health behavior** includes the table number and a description of the behavior being reported.
- B. Estimate or Percentage:** Percentage of students who reported a given behavior or answer. A period (.) appears whenever results meet the suppression criteria and are not shown to protect student confidentiality.
- C. Total Responses:** The number of students in the school or district who answered the question being reported. Some students may have chosen to skip some questions, for a variety of reasons.
- D. 95% confidence interval:** These numbers define the range that most likely contains the true percentage for your school or district. These intervals are also called “margins of error” and indicate the precision of the estimate – a larger range indicates less precision, a smaller range indicates more precision.

Key Definitions.

Weighting: The results in the current report are adjusted (“weighted”) so that the answers can represent all students in your school or district. The process of weighting takes into account each participating student’s probability of selection and matches the participant group to the total enrollment by grade, sex, and race/ethnicity.

Response Rates: Response rate is the total number of students who participated in the survey divided by the number of students randomly chosen to take the survey within a school or district. Generally, the higher the response rate, the more confidence that the survey results reflect the student population. Student response rates of 80% or higher are very desirable and increase confidence that the results are representative of the entire student population.

Confidentiality: In order to protect confidentiality, student responses are not released if they might allow someone to identify individual students. A period (.) appears whenever results meet certain “suppression” criteria used to maintain confidentiality. Our suppression criteria include results of 0% or 100%; results where the numerator has fewer than 3 students (e.g., the number of students who answered ‘yes’), or the number in the denominator is 30 or fewer (e.g., the number of students who answered the question).

Considerations When Using the Report.

The results presented here are snapshot estimates of population-level behavior. They can be used to make general observations and as soft guidance, supplemented with other sources of information and expertise.

Generalizability: The results are generalizable to the entire district population from which the sample was selected and weighted.

Comparability: The comparison to results within the same administration year, to previous years, and to other geographies are intended to be general observations only; due to differences in survey methodology, statistically significant differences cannot be inferred. Specifically, middle school and high school results are not comparable because question scope, wording, and response options vary. While effort was made to align with CDC protocol and past local processes, the shifts in roles, methodology, and environment make pre-2013 results not comparable to results from 2013 and beyond. Results of the 2017, 2015, and 2013 HKCS may be used to identify trends.
