TABLE OF CONTENTS

Introduction

Background	i
Questionnaire, Parent Consent, and Survey Administration	i
EXAMPLE: How to Read a Table.....	ii
Key Definitions	iii
For More Information	iv

Demographics

Table 1. Demographics and Response Rate	1
---	---

Body Weight

Table 2. Percentage of students who described themselves as slightly or very overweight	2
Table 3. Percentage of students who were trying to lose weight	3

Physical Activity

Table 4. Percentage of students who were physically active for a total of at least 60 minutes per day on five or more of the past seven days.....	4
Table 5. Percentage of students who were physically active for a total of at least 60 minutes per day on none of the past seven days.....	5
Table 6. Percentage of students who watched three or more hours of TV on an average school day.....	6
Table 7. Percentage of students who played video or computer games, spent time on social media, or used a computer for something that was not school work for three or more hours on an average school day	7
Table 8. Percentage of students who have three or more hours total screen time/average school day	8
Table 9. Percentage of students who attended physical education (PE) classes on one or more days in an average week	9
Table 10. Percentage of students who played on one or more sports teams during the past 12 months.....	10

Nutrition

Table 11. Percentage of students who ate fruit one or more times per day in the past 7 days	11
Table 12. Percentage of students who ate vegetables one or more times per day in the past 7 days.....	12
Table 13. Percentage of students who drank a can, bottle, or glass of soda or pop on one or more times per day during the past 7 days	13
Table 14. Percentage of students who drank a can, bottle or glass of sports drink	

	one or more times per day in the last 7 days	14
Table 15.	Percentage of students who drank a can, bottle, or glass of an energy drink one or more times per day in the last 7 days.....	15
Table 16.	Percentage of students who drank a can, bottle or glass of another sweetened beverage one or more times per day in the last 7 days.....	16
Table 17.	Percentage of students who ate breakfast on all of the past 7 days.....	17

Bullying

Table 18.	Percentage of students who have ever been bullied on school property	18
Table 19.	Percentage of students who had ever been electronically bullied.....	19
Table 20.	Percentage of students who had been teased or name called because of perceived sexual orientation during the past 12 months.....	20

Safety/Violence

Table 21.	Among students who ride a bicycle, the percentage who never or rarely wear a bicycle helmet.	21
Table 22.	Percentage of students who never/rarely wear a seat belt while riding in a car	22
Table 23.	Percentage of students who ever rode in a car driven by someone who had been drinking alcohol	23
Table 24.	Percentage of students who ever carried a weapon such as a gun, knife, or club on school property.....	24
Table 25.	Percentage of students who have ever been in a physical fight.....	25

Mental Health

Table 26.	Percentage of students who felt so sad or hopeless almost every day for two weeks or more in a row during the past 12 months that they stopped doing some usual activities.....	26
Table 27.	Percentage of students who ever seriously thought about killing themselves	27
Table 28.	Percentage of students who ever made a plan about how they would kill themselves	28
Table 29.	Percentage of students who ever tried to kill themselves.....	29
Table 30.	Percentage of students who have an adult to go to for help with a serious problem.....	30
Table 31.	Percentage of students who have someone to talk to when feeling sad, empty, hopeless, angry, or anxious	31

Tobacco

Table 32.	Percentage of students who ever tried cigarette smoking, even one or two puffs	32
Table 33.	Percentage of students who ever smoked a whole cigarette before the age of 11.....	33

Table 34.	Percentage of students who smoked cigarettes on one or more of the past 30 days	34
Table 35.	Among students who were younger than 16 and who reported current cigarette use, the percentage who usually got their own cigarettes by buying them in a store or gas station during the past 30 days.....	35
Table 36.	Percentage of students who feel it would be sort of easy or very easy to get cigarettes if they wanted.....	36
Table 37.	Percentage of students who think people who smoke one or more packs of cigarettes per day have a moderate or great risk of harm	37
Table 38.	Percentage of students who think their parents or guardians would feel it is wrong or very wrong if they smoked cigarettes	38
Table 39.	Percentage of students who have ever used an electronic vapor product	39

Alcohol

Table 40.	Percentage of students who had ever had a drink of alcohol, other than a few sips	40
Table 41.	Percentage of students who had their first drink of alcohol other than a few sips before the age of 11	41
Table 42.	Percentage of students who drank alcohol one or more days in the past 30 days.....	42
Table 43.	Percentage of students who think a typical student drank alcohol one or more days during the past 30 days	43
Table 44.	Percentage of students who feel it would be sort of easy or very easy to get alcohol if they wanted.....	44
Table 45.	Percentage of students who think people who drink one or two drinks nearly every day have moderate or great risk of harm.....	45
Table 46.	Percentage of students who think it is wrong or very wrong for someone the same age to drink alcohol regularly (at least once or twice per month).....	46
Table 47.	Percentage of students who think their parents or guardians would feel it is wrong or very wrong if they drank alcohol regularly (once or twice per month).....	47

Marijuana and other drugs

Table 48.	Percentage of students who have ever used marijuana.....	48
Table 49.	Percentage of students who tried marijuana for the first time before the age of 11	49
Table 50.	Percentage of students who used marijuana one or more times during the past 30 days.....	50
Table 51.	Percentage of students who think a typical student used marijuana one or more days during the past 30 days.....	51
Table 52.	Percentage of students who feel it would be sort of easy or very easy to get marijuana	

	if they wanted.....	52
Table 53.	Percentage of students who think people who use marijuana regularly have moderate or great risk of harm.....	53
Table 54.	Percentage of students who think it is wrong or very wrong for someone same age to use marijuana.....	54
Table 55.	Percentage of students who think their parents would feel it is wrong or very wrong if they used marijuana	55
Table 56.	Percentage of students who ever sniffed glue, breathed the contents of spray cans, or inhaled any paints or sprays to get high	56
Table 57.	Percentage of students who ever took a prescription pain medicine (such as Codeine, Vicodin, OxyContin, Hydrocodone, or Percocet) without a doctor’s prescription	57
Table 58.	Percentage of students who feel it would be sort of easy or very easy to get drugs like cocaine, LSD, amphetamines, or another illegal drug, if they wanted.....	58
Table 59.	Percentage of students who think it is wrong or very wrong for someone the same age to use illegal drugs.....	59

School, home and other health topics

Table 60.	Percentage of students who described their grades as mostly A’s or B’s over the past 12 months.....	60
Table 61.	Percentage of students who say their school grades are better than most students in their class.....	61
Table 62.	Percentage of students who participate in extracurricular activities at school.....	62
Table 63.	Percentage of students who think it is important or very important to go to college	63
Table 64.	Percentage of students who usually slept somewhere other than their parent/guardian’s home in the past 30 days.....	64
Table 65.	Percentage of students who had ever been told by a doctor or nurse that they had asthma.....	65

Understanding Healthy Kids Colorado Survey

Boulder Valley School District (BVSD)

Middle School Results

Background.

The [Healthy Kids Colorado Survey](#) (HKCS) collects anonymous health information from middle and high school students throughout the state. HKCS is conducted during odd-numbered years, most recently in the fall of 2017. More than 40,000 students in 252 middle and high schools participated in the fall 2015 survey. The questionnaire measures a wide range of health behaviors that affect a student's health, including physical activity, nutrition, health care, bullying, mental health, tobacco and substance use, sexual health (high school only), and family and school protective factors. HKCS is supported by the Colorado Department of Public Health and Environment (CDPHE), Colorado Department of Education (CDE), and Colorado Department of Human Services (CDHS). The survey is administered by the University of Colorado Anschutz Medical Campus by the Community, Epidemiology & Program Evaluation Group (CEPEG). In 2017, Boulder County Public Health participated on the HKCS Advisory Board and served as a liaison between the state HKCS survey administrators and local partners, primarily Boulder Valley School District (BVSD). Beginning in 2015, the high school sampling methodology differed from the middle school sampling methodology, so this introduction focuses on the middle school results that follow. See the "2015 BVSD Middle School Results Tables" at BoulderCountyHKCS.org for the middle school methodology and results.

Questionnaire, Parental Consent, and Survey Administration.

The majority of HKCS questions are drawn from the Centers for Disease Control and Prevention (CDC) Youth Risk Behavior Surveillance System, the nation's largest adolescent health survey, which has been ongoing for more than 20 years. Other questions included in the HKCS have been added with community input to meet additional data needs in Colorado.

The questionnaire is available in English and Spanish and takes about 45 minutes, or one class period, to complete by paper and pencil. (Students in a few schools completed the survey online in 2017 as a pilot program.) Teachers are given a script to read to students that emphasizes the anonymous and voluntary nature of the survey. Parental consent procedures are followed according to each district's guidelines, with a minimum of two weeks notification in advance of the administration date. Parents of BVSD students can opt-out their student by completing a paper form and returning it electronically, in a postage-paid envelope, or verbally by phone.

Students are ineligible to participate if they are unable to complete the survey in English or Spanish or because of disabilities. If a parent chooses not to allow their child to participate, or if the student declines to participate, they are asked to sit quietly at their desk and work on other school work.

In BVSD, the survey was administered to middle school students in grades 7 and 8 only. Hence, BVSD middle school results are not comparable to Colorado or national middle school results since they do not include grade 6. The middle school questionnaire contains 65 questions that are age-appropriate for younger adolescents, and the shorter length allows students more time to answer each question.

For the middle school survey, the state HKCS team selected a sample of schools to represent the state of Colorado. Within selected schools, a sample of classrooms was selected to participate in order to minimize the time commitment from schools. The results from the state sample were weighted to BVSD demographics (i.e., grade, sex, and race/ethnicity) in order to be representative of the BVSD student population.

EXAMPLE: How to Read a Table.

2017 HEALTHY KIDS COLORADO SURVEY RESULTS
Boulder Valley School District RE-2

Number of Responses: 994

A. Health Behavior **B. Estimate** **C. Total number of student responses**

Table 129. Percent of students who saw a doctor or nurse for a physical exam or check-up within the past 12 months

		Percentage (%)*	95% Confidence Interval
	Total	76.2	(70.5 - 81.9)
Sex	Female	76.4	(72.1 - 80.8)
	Male	75.6	(68.0 - 83.2)

D. Confidence interval

A. Health behavior includes the table number and a description of the behavior being reported.

B. Estimate or Percentage: Percentage of students who reported a given behavior or answer. A period (.) appears whenever results meet the suppression criteria and are not shown to protect student confidentiality.

C. Total Responses: The number of students in the school or district who answered the question being reported. Some students may have chosen to skip some questions, for a variety of reasons.

D. 95% confidence interval: These numbers define the range that most likely contains the true percentage for your school or district. These intervals are also called “margins of error” and indicate the precision of the estimate. A larger range indicates less precision, a smaller range indicates more precision.

Key Definitions.

Weighting: The results in the current report are adjusted (“weighted”) so that the answers can represent all students in the district. The process of weighting takes into account each participating student’s probability of selection and matches the participant group to the total enrollment by grade, gender, and race/ethnicity.

Response Rates: District response rate is the total number of students who participated in the survey divided by the number of students within BVSD randomly chosen to take the survey. Generally, the higher the response rate, the more confidence that the survey results reflect the student population. Student response rates of 80% or higher are very desirable and increase confidence that the results are representative of the entire student population.

Confidentiality: In order to protect confidentiality, student responses are not released if they might allow someone to identify individual students. A period (.) appears whenever results meet certain “suppression” criteria used to maintain confidentiality. Our suppression criteria include results of 0% or 100%; results where the numerator has 3 or fewer students (i.e., the number of students who reported a given behavior or answer), or the number in the denominator is 30 or fewer (i.e., the number of students who answered the question).

Considerations When Using the Report.

The results presented here are snapshot estimates of population-level behavior. They can be used to make general observations and as soft guidance, supplemented with other sources of information and expertise.

Generalizability: The results are generalizable to the entire district population from which the sample was selected and weighted.

Comparability: The comparison to results within the same administration year, to previous years, and to other geographies are intended to be general observations only; due to differences in survey methodology, statistically significant differences cannot be inferred. Specifically, middle school and high school results are not comparable because question scope, wording, and response options vary. While effort was made to align with CDC protocol and past local processes, the shifts in roles, methodology, and environment make pre-2013 results not comparable to results from 2013 and beyond. Results of the 2017, 2015, and 2013 HKCS may be used to identify trends.
