

Zoonotic Disease Report July 8 – July 14, 2018 (Week 28)

Executive Summary

- Weld County reports the first positive West Nile virus pools in the state.
- Twenty six mosquito pools were submitted for WNV. Results are pending
- Statewide 231 specimens have tested positive for rabies in 2018. This number of positive animals surpasses the previous season high of 191 in 2013.
- [2018 Colorado rabies positive specimens](#): Skunk (185), Bat (37), Raccoon (2), Cat (4), Dog (2), Alpaca (1)
- Boulder County reports two rabies positive specimens for the year: Skunk (1), Bat (1)
- Mosquito traps counts were above average for this week.
- Five bats and one skunk were submitted for rabies testing. The skunk tested negative. One bat was untestable, three bats were negative and results are pending on one specimen.
- No specimens were submitted for plague, tularemia, or hantavirus testing.

Information about symptoms, transmission, and prevention is always available at BoulderCountyVector.org

West Nile virus (WNV) Activity

SEASON-TO-DATE HUMAN WEST NILE VIRUS (WNV) ACTIVITY

West Nile virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District’s adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

VECTOR INDEX			
	ZONE 1	ZONE 2	ZONE 3

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health, other agencies or private veterinary practices.
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
