

The Twentieth Judicial District moved to the State e-discovery system ediscovery.state.co.us on February 18, 2020. All e-discovery from February 18, 2020 forward will be released on the State site. E-Discovery prior to February 18, 2020 may be obtained from the [JusticeWeb](#) until **May 31, 2020 at which time access to JusticeWeb will not be available.** Instructions for accessing the JusticeWeb are outlined below.

If you are an attorney, in order to receive discovery you must do three things:

1. Obtain an account from [JusticeWeb](#), which is the e-discovery system used by the Twentieth Judicial District District Attorney to produce discovery in criminal case.
 2. You must file an Entry of Appearance with the Court before discovery will be made available to you on JusticeWeb. Please wait 48 hours after filing an Entry of Appearance before inquiring about discovery. If you still do not see discovery for the case after 48 hours, please contact the District Attorney's Office.
 3. You must also install [7-ZIP](#) on your computer ([Unarchiver](#) or WinZip works with Macintosh).
- To register on JusticeWeb, click the button below to go to the JusticeWeb website and request an account.
[Justice Web](#)

[JusticeWeb](#) is a portal for criminal justice professionals to instantly access information from the Boulder District Attorney's Office. If you are a defense attorney, you will receive e-discovery from the Boulder District Attorney's Office, via JusticeWeb, and **must request an account**. Once approved, an email will be sent to you confirming your account. You will then be able to log into the JusticeWeb e-Discovery website by entering the sign-in credentials you provided.

Please be aware that the Boulder District Attorney's office cannot provide technical assistance relating to the downloading of discovery. Certain operating systems and platforms may be incompatible with e-discovery, and your computer may lack certain "codecs" or software to open certain file types. It is your responsibility to research and obtain any programs, software, plug-ins, etc. necessary in order for you to view and download discovery. It is further your responsibility to obtain technical assistance from your own IT department, or IT specialist, if you are having difficulties. Additionally, it is recommended that if you are having difficulty accessing discovery on the computer you are using that you attempt to access the materials using a computer with a different operating system (i.e. if you are using a Mac, try a PC instead and vice versa). Before attempting to download or access any materials through JusticeWeb, you are further required to read the information provided on the "discovery" website (link below).

You will ONLY have access to e-Discovery for cases in which the District Attorney has received a copy of an Entry of Appearance that has been filed with the Court. Please be advised that the District Attorney will no longer accept attorney requests for discovery via the discovery request form on the DA's website, by email, phone call, or in person. You MUST obtain a JusticeWeb account. A link will appear here for you to login to JusticeWeb and request an account.

<https://justicewebprd.bouldercounty.org/JusticeWeb>.

Please note that accounts can only be activated in the name of a licensed attorney. It may take up to one business day to activate your account.

- If you are running Windows OS, you must install 7-Zip or WinZip to view the documents in the zipped file. If you are running on a Macintosh OS, you must install Unarchiver or WinZip. Please note, 7-Zip and Unarchiver are free programs. The first time try to open the zip file, you will need to manually tell your system to open the zip file with these software products. These free product do not automatically associate the .zip extension to the software.
 - Click on the button below to receive instructions on installing a free copy of 7-ZIP.
[7-ZIP](#) (Note: Edge does not work well with 7-Zip. Please use a different browser).
 - Click on the button below to receive instructions on installing a free copy of Unarchiver.

NEW! CLICK HERE - STEP BY STEP VIDEO TUTORIAL FOR DISCOVERY DOWNLOADS

Please note that the Boulder District Attorney will no longer accept requests for discovery from attorneys via telephone, email, or in person.

Please be advised that the Boulder District Attorney's Office generally receives discovery in the format in which it was recorded by, or transmitted to, the providing party. This material is then exactly duplicated and provided through the discovery process. Oftentimes, files do not open automatically with standard media viewing software or require proprietary software or specialized "codecs." If you receive a piece of electronic discovery which does not open or play on your computer the issue can most often be resolved by researching whether the programs you have are compatible with the file. Most commonly this can be accomplished by researching the file extension (.doc, .gif, .msg, .xml, etc.) typically a program can be downloaded for free or for a small fee which will allow your computer to play the program. As an example, photographs from the Boulder Police Department are often saved in a .msg format. There are numerous programs which are compatible with .msg and which will allow you to view the photos if you do not have Outlook on your own computer. One such program is Msgviewer. MsgViewer is an email viewer utility for .msg (Outlook) messages. It requires Java to be installed and will work on Windows, Linux and Mac platforms. MsgViewer is considered open source and is a free download. As with any open source software, there are no guarantees that it will be free of malware, and you download this and other programs at your own risk. It is also important to note that oftentimes agencies will include the proprietary software necessary to access the file on the discovery disk itself such that downloading a new program is not necessary. The Boulder County District Attorney's Office regrets it cannot provide software licenses, programs, or technical assistance for the operation of discovery. If you have confirmed that the provided discovery should open on your computer and it still does not, please return the disk to us and we will determine if a working copy can be made or if the original is faulty in some way.
