STAFF UPDATE(S) ON PROJECTS AND/OR DEVELOPMENT REVIEW ITEMS

Nicole Wobus provided an update on a change of date for the Planning Highlights Bike Tour in honor of the American Planning Association’s National Community Planning Month. County staff has organized a bike tour in partnership with City of Longmont planning staff to highlight planning
successes and challenges in the Longmont area. The Planning Highlights Bike Tour will take place on October 19 at 2pm, starting in Longmont’s Roosevelt Park. The tour will include a 17 mile route, as well as a shorter route, and will provide an opportunity to test E-Bikes. The tour is open to members of the public as well as Planning Commissioners and staff across the county. Event Website Link: www.bit.ly/BoCoPlanningMonth.

Docket DC-18-0002: Solar Energy Systems Text Amendments

Sinead O’Dwyer, Long Range Planner, presented the proposed Land Use Code amendments pertaining to solar energy systems, the reasons for the amendments, referral comments, and changes since the study session. The staff report for this agenda item also provides the proposed code amendment referral process and comments, staff research and staff recommendation. Staff recommended that the Boulder County Planning Commission recommend to the Board of County Commissioners APPROVAL of Docket DC-18-0002.

PUBLIC HEARING OPENED

SPEAKERS: Byron Kominek - 8102 N. 95th St

PUBLIC HEARING CLOSED

SUMMARY: The Planning Commissioners discussed the proposed amendments and particularly the treatment of solar on BCCP-designated Significant Agricultural Lands, identifying a desire to balance opening additional appropriate land areas in the county for solar development with preservation of existing agricultural character and values. Some Planning Commission members expressed that the size cap for solar energy systems on Significant Agricultural Land might not be necessary given the other factors limiting solar development, including grid interconnection and limited opportunity from utility companies. Comparatively, there were other concerns regarding the location and size of solar development and associated impacts on agricultural lands, as well as questions around future decommissioning of retired systems on Significant Agricultural Lands. It was established that these items could be considered by Planning Commission through the Special Use Review criteria in 4-602, as would be required for each individual project under the proposed amendments. Staff and Planning Commission agreed that solar should not be considered on par with an industrial use as described in the Boulder County Comprehensive Plan and Land Use Code, because the infrastructure and traffic impacts related to solar are significantly less than traditional industrial uses. Additionally, it was acknowledged that some agricultural uses are increasingly found to be compatible and able to continue under and around solar development. The point was raised that “rural character” refers to healthy and productive land. Uses of rural land may evolve over time and ultimately differ from traditional rural uses. For instance, solar energy systems may be viewed as consistent with innovative character type of the “American Farmer” to come up with a clever use of agricultural space in the face of changing needs and society. There were additional concerns expressed for the potential extent of solar development in the County and the request to revisit these regulations in a year or two to determine the effectiveness of the regulations in achieving their intent to balance solar development with Significant Agricultural Land preservation.

MOTION: Lieschen Gargano MOVED that Planning Commission recommend that the Board of County Commissioners APPROVE the proposed Land Use Code text amendments to solar-related provisions in Docket DC-18-0002: Proposed Amendments to the Boulder County Land Use Code related to Solar Energy Systems as presented in Attachment B of this staff report.
