

## Zoonotic Disease Report June 2 – June 8, 2019 (Week 23)

### Executive Summary

- Statewide, 86 specimens have tested positive for rabies in 2019; in the past week, new positives were found in Arapahoe, Denver, El Paso, Larimer, and Weld County.
- 2019 Colorado rabies positive specimens: Skunk(73), Bat(8), Raccoon(2), Fox(1), Bovine(1), Dog(1)
- Boulder County has had only two positive rabies specimens to date, both are bats.
- One cat tested negative for rabies. Three bats and one raccoon were submitted for testing; results are pending.
- Full larval mosquito control is underway. Traps showed lower-than-average mosquito counts; of the 969 recorded mosquitoes, only 4.6% were *Culex*.
- Testing of mosquitoes for West Nile virus will begin June 10<sup>th</sup>.

#### Lab-confirmed, rabies positive animals by county, Colorado, Jan. 1 - June 6, 2019

\*red denotes an increase since the previous week

County	Bat	Skunk	Other wildlife	Domestic	Total
Adams		1			1
Arapahoe		1			1
Boulder	2				2
Denver	2	1	1 (raccoon)		4
Douglas		3			3
El Paso		7	1 (fox)	1 (dog)	9
Jefferson		2			2

# Mosquito Activity

## Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

### Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health by other agencies or private veterinary practices.
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (\*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
