

## Zoonotic Disease Report July 07 – July 13, 2019 (Week 28)

### Executive Summary

- Statewide, 94 specimens have tested positive for rabies in 2019.
- 2019 Colorado rabies positive specimens: Skunk(77) Bat(12) Raccoon(2) Fox(1) Bovine(1) Dog(1)
- Boulder County has had only two positive rabies specimens to date, both are bats.
- Six bats were submitted for testing in Boulder County this week; five tested negative, and one was not tested.
- Nineteen mosquito pools were tested for WNV, all were negative.
- Mosquito traps this week were again higher than average with nuisance species, with a rising proportion of *Culex*; of the 26,676 recorded mosquitoes, 9.7% were *Culex*.

## Mosquito Activity

## West Nile virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District’s adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

## Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

### Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health by other agencies or private veterinary practices.
- ‘Positive Vectors’ include only samples that have tested positive. Some samples submitted may be deemed untestable.
- ‘Submitted Vectors’ denoted with (\*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
