

Zoonotic Disease Report August 4 – August 10, 2019 (Week 32)

Executive Summary

- Thirty-two mosquito pools were submitted for WNV testing; one pool tested positive in Sentinel Zone 2. While the Vector Index (VI) of 0.32 is below the “high-risk” threshold of 0.75, this positive mosquito pool reinforces that West Nile virus is still a threat to our communities.
- Fifteen mosquito pools have tested positive for WNV in Colorado this season: Larimer (6) Weld (4) La Plata (2) Pueblo (1) Adams (1) Boulder (1).
- Mosquito traps this week were significantly higher than average with nuisance and vector species; of the 16,873 recorded mosquitoes, 50% were *Culex*.
- Statewide, 116 specimens have tested positive for rabies in 2019.
- 2019 Colorado rabies positive specimens: Skunk(88) Bat(23) Raccoon(2) Fox(1) Bovine(1) Dog(1)
- Boulder County has three positive rabies specimens to date, all are bats.
- A bat and a racoon were submitted for rabies testing in Boulder County this week; both tested negative.

West Nile virus (WNV) Activity

Mosquito Activity

West Nile virus (WNV) Vector Index

The vector index is a function of calculated infection rate, adjusted for *Culex* mosquito population size, within a given area. It is used to estimate human West Nile virus (WNV) transmission risk. A vector index of **0.75** or above in Boulder County is an indicator of high risk for WNV transmission to humans, and influences the Mosquito Control District’s adult mosquito emergency control measures. A vector index is calculated for [three monitoring zones in Boulder County](#).

VECTOR INDEX			
	ZONE 1	ZONE 2	ZONE 3
Season Week	Vector Index	Vector Index	Vector Index
Week 21	----	----	----
Week 22	----	----	----
Week 23	----	----	----
Week 24	0.00	0.00	0.00
Week 25	0.00	0.00	0.00
Week 26	0.00	0.00	0.00
Week 27	0.00	0.00	0.00
Week 28	0.00	0.00	0.00
Week 29	0.00	0.00	0.00
Week 30	0.00	0.00	0.00
Week 31	0.00	0.00	0.00
Week 32	0.00	0.32	0.00

Animal Disease Activity

Each week, Boulder County and municipal Animal Control Units responds to animal complaints throughout the county. When deemed necessary, these specimens are sent to state laboratories for zoonotic disease testing.

Caveats

- Data are provided from the Colorado Department of Public Health and Environment (CDPHE) Zoonotic database and may not include samples submitted for testing prior to publishing of this report.
- Data reflect all samples submitted by Boulder County Public Health by other agencies or private veterinary practices.
- 'Positive Vectors' include only samples that have tested positive. Some samples submitted may be deemed untestable.
- 'Submitted Vectors' denoted with (*) indicate that at least one sample was untestable. Untestable samples may be treated as positive for follow-up protocol.
