FluView
Seasonal syndromic surveillance for influenza-like illness in Boulder County.

April 8, 2020

Summary
For the week ending April 4, the geographic spread of influenza in the state is regional. The rate of ILI-related emergency department visits increased slightly this week in Boulder County and continued to exceed baseline. Thus far during the 2019-2020 influenza season, there have been three pediatric deaths reported in Colorado. There have been sixty-four outbreaks associated with influenza in long-term care settings reported in the state.

Number of influenza-associated hospitalizations in Boulder County and Colorado: September 29, 2019-April 4, 2020
