State-Sponsored Community Testing Site
Recording Policy

Purpose:
1. To comply with the Health Insurance Portability and Accountability Act (HIPAA) Standards for Privacy of Individually Identifiable Health Information (Privacy Standards), and any and all other Federal regulations and guidelines.
2. To establish guidelines for photography, video, or audio recordings to protect patient privacy, enhance confidentiality, and maintain security at state-sponsored COVID-19 testing sites.

Definitions:
- Photography: recording an individual's likeness (e.g. image, picture) using photography (e.g. camera, cell phone), video recording (e.g. video camera cell phone), digital imaging (e.g. digital camera, web camera), or other technologies capable of capturing an image (e.g. FaceTime, Zoom).
- Audio Recording: recording an individual's voice using video recording (e.g. video camera, cell phone), tape recorders, or other technologies capable of capturing audio.

Policy Statement:
- Photography, video, and audio recordings are prohibited at any state-sponsored COVID-19 testing site.
- The one exception is photography and recordings that are used for training purposes only and must have the authorized consent of all individuals being recorded.
